

CRIME INVESTIGATION - EVIDENCE REPORT

Case Reference: GOA-2026-DT-0115

Prepared by: Forensic Team: Dr. Anita Prabhu, Inspector Savio Fernandes

Date: Evidence Logged: 15 September 2026, 02:00 AM

1. Seized Material

Item E-001: 6 kg MDMA tablets in vacuum packs from the Anjuna rented villa. Item E-002: 2.2 kg cocaine in concealed compartments in a shack storeroom in Baga. Item E-003: 3,000 LSD blotters in sealed plastic sheets. Item E-004: Rs. 18 lakh in cash recovered from a locked cupboard in the Baga shack manager's room. Item E-005: Three burner phones, two laptops and a digital scale.

2. Digital and Financial Evidence

Encrypted chats recovered from one phone reference 'parcels', 'blue tablets' and pickup times, and mention an 'inspector friend'. Bus company records show a passenger carrying a bag on the Bengaluru-Goa route on eight occasions, matching delivery dates. CCTV at the Baga shack shows the manager receiving a bag from a taxi driver at 9:40 PM. Cryptocurrency wallet records link to an online payments handler.

3. Witness and Informant Intelligence

Informant: Named the shack owner as the head of the network and said advance warnings about police movement had been received earlier that week. A shack cook states he saw large bags carried in at night but was told not to ask questions. A British tourist detained at Anjuna was found with 2 grams of MDMA for personal use and says she bought it on the beach; she has no other link.

4. Forensic Findings

Fingerprints on the MDMA packaging match two persons, one of whom is a known courier. Boat GPS data shows a fishing boat meeting an offshore vessel twice in two months. Chemical analysis suggests European origin of the MDMA.
