

# CRIME INVESTIGATION — EVIDENCE REPORT

Case Reference: HYD-2025-DT-0089

Prepared by: Forensic Team: Dr. Rashida Begum, Inspector Saleem Khan

Date: Evidence Logged: 19 October 2025, 03:00 AM

---

## 1. Seized Narcotics and Physical Evidence

Item E-001: 4.5 kg MDMA tablets in vacuum-sealed packets recovered from Balanagar warehouse. Forensic analysis confirms 89% purity — consistent with international supply rather than local production. Item E-002: 800 grams cocaine in heat-sealed foil packets, recovered from a concealed compartment beneath the warehouse floor. Item E-003: 12 kg cannabis in compressed blocks, hidden inside vegetable crates in the warehouse. Item E-004: Rs. 14 lakh in cash recovered from Club Neon manager's office in a false-bottom drawer. Item E-005: Digital weighing scale, heat sealer, and packaging materials recovered from the warehouse — consistent with drug repackaging operation. Item E-006: 4 burner mobile phones recovered across the three locations. Forensics extracting call logs and messages.

## 2. Digital and Financial Evidence

Encrypted messaging app (Signal) on one recovered phone shows conversations referencing 'shipment', 'green packets', and 'collection' — consistent with coded drug trafficking communication. Cryptocurrency wallet on a laptop recovered from Banjara Hills apartment shows transactions of Rs. 45 lakh equivalent over 14 months to an overseas wallet. CCTV from Balanagar warehouse entrance captures a commercial truck (TS-09-GH-4421) arriving at 9:15 PM on 18 October, offloading crates. Driver identified. Club Neon CCTV shows the club manager meeting with an unidentified individual in the parking area at 10:30 PM, exchanging a bag — 45 minutes before the raid.

## 3. Witness and Informant Intelligence

CI-047 (identity protected): Confirmed the network structure, identified the warehouse as the primary storage point, and named two key members of the network. Informant stated the network leader 'Cobra' communicates only through intermediaries. Arrested warehouse worker (approver): One arrested individual has agreed to turn approver and has provided a statement naming the network organiser and the politician's associate involved in providing protection. Statement corroborated by independently retrieved phone records. Truck driver (TS-09-GH-4421): Claims he was hired for a routine vegetable delivery and was unaware of the contraband. Under investigation — phone shows contact with a known network member 3 days before the delivery.

## 4. Forensic Findings

Fingerprints from the drug packaging match two individuals — analysis ongoing. DNA from cigarette stubs recovered near the warehouse entrance is being processed. Chemical analysis

of MDMA confirms origin consistent with known European supply chains — suggesting an international connection. Financial forensics team is tracing the Rs. 78 lakh in cash deposits to identify the full network of money laundering accounts.
