

CRIME INVESTIGATION — INCIDENT & BACKGROUND REPORT

Case Reference: HYD-2025-DT-0089

Prepared by: Inspector Saleem Khan, SIT Narcotics Cell, Hyderabad City Police

Date: Operation Date: 18 October 2025 | Report: 19 October 2025

1. Nature of Incident

This case involves the detection and investigation of a large-scale narcotics trafficking network operating across Hyderabad, supplying MDMA (ecstasy), cocaine, and high-grade cannabis to nightclubs and private party circuits. The SIT Narcotics Cell received a tip-off from a registered informant (Confidential Informant CI-047) on 10 October 2025 regarding a major drug consignment expected to arrive in Hyderabad on 18 October 2025. A coordinated raid was planned and executed.

2. Operation Summary

On 18 October 2025, at 11:30 PM, SIT officers raided three locations simultaneously: a rented warehouse in Balanagar Industrial Area, a luxury apartment in Banjara Hills, and a nightclub called Club Neon in Jubilee Hills. At the Balanagar warehouse, officers seized 4.5 kg of MDMA tablets, 800 grams of cocaine, and 12 kg of cannabis. Estimated street value: Rs. 3.2 crore. Three individuals were arrested at the warehouse. One individual was arrested at the Banjara Hills apartment. The nightclub raid yielded drug paraphernalia and cash of Rs. 14 lakh. Two individuals fled before officers arrived at the nightclub.

3. Background — Known Network

Intelligence reports suggest the network has been operational for approximately 18 months. Supply chain originates from a Mumbai-based distributor and is routed through Hyderabad via road transport using commercial vegetable trucks as cover. The network operates using encrypted messaging apps and burner phones. Financial transactions are primarily in cash with some transactions routed through cryptocurrency wallets traced by the cybercrime unit.

4. Informant Intelligence

CI-047 provided information that the network is led by an individual known by the alias 'Cobra' who is never present at transaction points directly. The informant identified Club Neon as the primary distribution point and named a club manager as a key link in the network. CI-047 also indicated that a local politician's associate had been providing protection to the network in exchange for payments. The informant's identity is protected under witness protection provisions.

5. Financial Trail

Bank account analysis reveals multiple cash deposits across 6 different accounts linked to network members, totalling Rs. 78 lakh over 18 months. Cryptocurrency wallet analysis by the cybercrime unit traced transactions equivalent to Rs. 45 lakh to wallets associated with two suspects. Shell company accounts registered in Bengaluru and Mumbai appear to be used for laundering trafficking proceeds.
